

CAMP Systems and Raytheon Aircraft Company Announce Maintenance Tracking Service Agreement

WICHITA, Kan. (Jan. 30, 2007) – CAMP Systems and Raytheon Aircraft Company (RAC) are pleased to announce that CAMP has acquired the FACTS maintenance tracking business from Raytheon Aircraft Company. As part of the agreement, RAC has designated CAMP as the exclusive factory-endorsed provider of maintenance tracking services for all Hawker® and Beechcraft® aircraft.

“CAMP’s core business is maintenance tracking,” said Randy Groom, president of Global Customer Service and Support for Raytheon Aircraft Company. “CAMP invests over \$4 million annually in new technology and development. This combined with a staff of over 200 employees worldwide, makes CAMP an ideal long-term solution for our customers.” He added: “CAMP also will provide extensive feedback to Raytheon Aircraft Company for maintenance and reliability data for the entire Hawker and Beechcraft fleet.”

“CAMP is pleased to be selected by Raytheon Aircraft Company,” said Ken Gray, chief executive officer of CAMP Systems. “As a result of the agreement, the majority of Beechcraft and Hawker aircraft will now be on a single web-based maintenance tracking system. We expect to upgrade the level of service to existing FACTS customers at no additional charge.”

About CAMP Systems

CAMP Systems International Inc. is the leading supplier of aircraft maintenance solutions to the business aircraft market. Founded in 1967, CAMP provides services for more than 4,500 aircraft worldwide.

About Raytheon Aircraft Company
